Skills

Languages: C, C++, C#, Python, JavaScript, PHP, Java, R

Databases: PostgreSQL, MySQL

Backend: ASP.NET Core, ASP.NET Core MVC

Frontend Tools: HTML, CSS, Tailwind CSS

Tools: Git, GitHub, Google Colab, Kaggle, AutoCAD

Machine Learning: Supervised/Unsupervised Learning, Transfer learning, Data Preprocessing, Computer Vision

Work Experience

Freelance C# Desktop Application Developer

2025–Present

Self-employed

- Developed and delivered six desktop applications in C# for university course projects, translating student requirements into functional applications.
- Provided hands-on testing, bug fixes and post-delivery support to ensure students met their course submission criteria.

Education

American International University, Bangladesh

2023–Present

B.Sc. in Computer Science and Engineering

CGPA: 3.62

Government M.M College, Jessore

2018–2020

Higher Secondary Certificate (HSC)

GPA: 5.00

Police Line Secondary School, Jessore

2016–2018

Secondary School Certificate (SSC)

GPA: 5.00

Project Work

LawFirm — Online Law Firm Management System 🌐 🗄️

Spring 2025–2026

ASP.NET Core MVC, EF Core, C#, MySQL

- Built a role-based law firm management system with separate Admin, Lawyer and Customer portals using ASP.NET Core MVC and Entity Framework Core (Code First).
- Implemented session-based authentication, AutoMapper for DTO-entity mapping, and integrated Bkash for online payment processing.

Online Marketplace — Buy & Sell Web Platform 🗄️

Fall 2025–2026

HTML, CSS, JavaScript, PHP

- Developed a web-based marketplace that allows users to post, browse and purchase new or used products.
- Implemented product listings, basic search/browsing functionality and server-side handling using PHP for managing product data.

Research Job — Desktop Application for Researcher-Student Hiring 🗄️

Fall 2024–2025

C# (.NET), WinForms, MySQL

- Developed a C# desktop application where researchers can post research opportunities and hire students interested in participating in research work.
- Implemented features for creating job posts, browsing opportunities, and managing student applications within a structured interface.

Computer Graphics — 2D Scenery of Bangladesh National Parliament Building 🗄️

Summer 2024–2025

C++, OpenGL (GLUT)

- Designed and rendered a graphical scenery of the national parliament building and its surroundings using OpenGL and GLUT in C++.
- Applied computer graphics concepts such as transformations, object modeling, and scene composition to create a visually detailed environment.

Solar-Powered Microbial Soil Health Monitor

Spring 2024–2025

ESP8266, Arduino, ThingSpeak

- Developed an IoT system for real-time soil/environmental monitoring with automated alerts and data logging to ThingSpeak via ESP8266.

Taylor — Online Dress Store

Fall 2023–2024

Java, C#, SQL

- Developed an e-commerce app featuring product catalog, shopping cart, and secure checkout for men's and women's fashion.

Research & Publications

Traffic Sign Detection in Low-Light: Improved LLE-STD Using YOLOv8m <i>Kaggle, NVIDIA T4 GPU, YOLOv8m, Zero-DCE++ , CNTSSS Dataset</i>	2025–Ongoing
- Investigated low-light traffic sign detection by integrating Zero-DCE++ image enhancement with YOLOv8m, improving visibility in night-time conditions. - Conducted experiments on CNTSSS dataset (4,062 night-time images) over 46 epochs; evaluated Precision, Recall, mAP50, mAP50-95, and F1 metrics. - Demonstrated superior performance vs. YOLO-LLTS and LLE-STD baselines, highlighting enhanced robustness in low-light scenarios.	

Awards and Certificates

Dean’s List Honors — American International University, Bangladesh	Fall 2023–2024
Recognized for academic excellence after earning a semester GPA of 3.77.
