Work Experience

Freelance C# Desktop Application Developer - Self-employed 2025-Present

- Developed and delivered six desktop applications in C# for university course projects, translating student requirements into functional application.
- Provided hands-on testing, bug fixes and post-delivery support to ensure students met their course submission criteria.

Projects

Research Job — Desktop Application for Researcher-Student Hiring Fall 2024-2025
C# (.NET), WinForms, MySQL

- Developed a C# desktop application where researchers can post research opportunities and hire students interested in participating in research work.
- Implemented features for creating job posts, browsing opportunities, and managing student applications within a structured interface.

Computer Graphics — 2D Scenery of Bangladesh National Parliament Building Summer 2024-2025
C++, OpenGL (GLUT)

- Designed and rendered a graphical scenery of the national parliament building and its surroundings using OpenGL and GLUT in C++.
- Applied computer graphics concepts such as transformations, object modeling, and scene composition to create a visually detailed environment.

Online Marketplace — Buy & Sell Web Platform Fall 2025-2026
HTML, CSS, JavaScript, PHP

- Developed a web-based marketplace that allows users to post, browse and purchase new or used products.
- Implemented product listings, basic search/browsing functionality and server-side handling using PHP for managing product data.

Awards

Dean's List Honors — American International University, Bangladesh Fall 2023-2024

- Recognized for academic excellence after earning a semester GPA of 3.77

Research & Publications

Traffic Sign Detection in Low Light: Improved LLE-STD Using YOLOv8m 2025-Present

- Integrated Zero-DCE++ with YOLOv8m for low-light traffic-sign detection. Evaluated on CNTSSS (4,062 images, 46 epochs), outperforming YOLO-LLTS and LLE-STD on precision, mAP, recall, and F1
